

A collaborative and interactive online OH&S MANAGEMENT SYSTEM ...

Using NEXT GENERATION software, Hazard Interactive provides the online platform for your organization to collaborate in the management of hazards and incidents

Hazard Interactive components include:

Hazard Manager for proactive hazard assessments and for documenting existing controls and new treatments (actions) to manage the likelihood or the consequence of an event. It may include compliance functionality.

Incident Manager to record incidents (events) that may have affected employees and to record causes and take remedial action.

Advantages of Hazard Interactive

Hazard Interactive is based on a simple proven approach to risk reduction, supporting AS/NZS 4360 and other international standards such as ISO 31000.

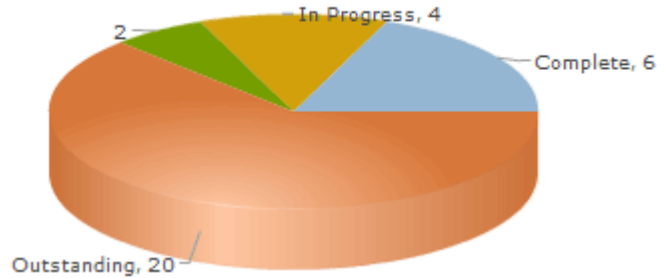

- Addresses the record keeping difficulties associated with paper - based systems via the use of a centralized database
- Provides a collaborative, interactive approach to hazard management, servicing multiple locations and personnel. Improves Risk Culture
- Assists in embedding the process of Hazard Risk Management into an organisation's culture through a collaborative team approach
- System is live to ensure that most recent information or report is immediately available for all to see and collaborate on
- Ensures hazards and incidents are reported and acted upon , including notifications required by law
- Employees are collaboratively involved in safety decisions
- Very simple and easy to use. People have used this software without any training

Reporting

A wide range of reports is available including a Report Wizard

Hazard Progress Report

Hazards listed by Location, Priority and Status.

Hazards with Replies indicate that the collaboration process is underway

Town	State	Title	Priority	Status	Replies
